Triesterstrasse

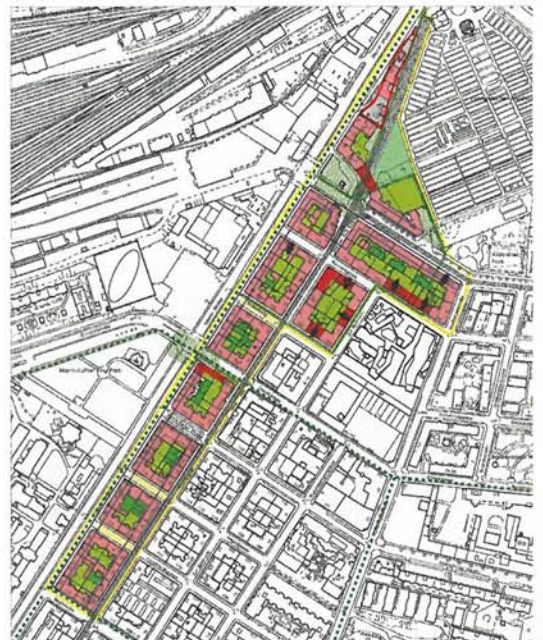

Triesterstrasse 的小区改造包括72幢楼房的不同物业主。

后院的一些小建筑物因阻挡阳光而被拆除，取而代之的是更大的绿化面积，并在面向路边的建筑加上封闭式阳台。每幢独立建筑之间建造相连的走廊，并在建筑顶部建造露天阳台。在后院不可拆除的小企业建筑上加盖防噪屋顶。小区改造的措施包括实行低噪音交通，并在建筑和公路之间设立自行车道和绿化带。

The block renewal area on Triesterstrasse includes 72 individual buildings with different ownership.

Outbuildings in the courtyards which have been keeping the sunlight out are to be partly torn down and replaced by green areas and gardens. Buildings facing the streets will have terrace apartments added to them to make up for the loss of living space. Individual buildings will be connected by porches to create weatherproof paths. Businesses located in the courtyards will also be roofed to minimize working noise. Terraces will be laid out on the roofs.

Block renewal also provides for measures to calm traffic and set the buildings apart from the street by planting trees and creating a cycle path.
